

Mfr. Model # 6121KA

MASTER LOCK Padlock: Black, Unfinished, Steel, Std Shackle, Boron Alloy, 1 1/8 in Vert Clearance. Keyed Alike

Product Description

These keyed alike padlocks have a standard shackle, which means the shackle's vertical clearance is less than 1-1/2". Their smaller clearance makes them less vulnerable to cutting than long shackle padlocks. They are used across a wide variety of applications, such as securing files in a cabinet or protecting individual toolboxes. Keyed alike padlocks open with the same key, allowing one authorized user to access multiple locks
