

Mfr. Model # M1KASTS

MASTER LOCK Padlock: Silver, Unfinished, Stainless Steel, Std Shackle, Boron Alloy. Keyed Alike

Product Description

These keyed alike padlocks have a standard shackle, which means the shackle's vertical clearance is less than 1-1/2". Their smaller clearance makes them less vulnerable to cutting than long shackle padlocks. They are used across a wide variety of applications, such as securing files in a cabinet or protecting individual toolboxes. Keyed alike padlocks open with the same key, allowing one authorized user to access multiple locks.

Shackle Type Standard Shackle	Brand MASTER LOCK
Key Code 2246	Manufacturer Part Number M1KASTS
