

Mfr. Model 3LH

MASTER LOCK Padlock: Silver, Steel, Unfinished, Long Shackle, Steel Shackle, 2 in Vertical Clearance

Product Description

These keyed different padlocks have a long shackle, which has a vertical shackle clearance of 1-1/2" or more. This allows them to secure multiple hasps or fittings at once, such as two handles that are spaced far apart. Keyed different padlocks open with unique keys, which limit access to a single user.
